E-MAIL: S2558991@ed.ac.uk | TEL: (+86) 18986121212 | ADDRESS: Wuhan, Hubei, China

EDUCATION BACKGROUND

University of Edinburgh

Sep. 2023-May

2027

Expected Degree: BSc (Hons) Mathematics and Business, School of Mathematics

Average Score: 71/100 | **GPA:** 3.71/4.00 (first class, 1:1 based on coursework to date)

Notable Modules: Mathematics and Quantitative Methods;

Nanyang Technological University (NTU)

Aug. 2025-May

2026

Exchange Programme: Mathematical Sciences and Economics

Average Score:

Notable Modules: Econometrics; Quantitative Methods for Business; Mathematical Modelling; Introductory Statistics with Applications

Summer School, Peking University

Jun. 2025-Jul. 2025

Modules Taken:

- **An Introduction to Causality Identification Methods (2 credits):** Explored causal inference techniques, including DID, RDD, and IV; analysed empirical research papers and delivered literature-based presentations.
- **Data Analysis and Applications with Stata (2 credits):** Acquired Stata for data processing, visualisation, regression modelling and statistical testing; replicated empirical results from academic publications and performed end-to-end quantitative analysis using real datasets.

RESEARCH PROJECTS

Research Intern, The Analysis of The References of The Intergovernmental Panel on Climate Change Assessment Reports

Jul. 2025-

Present

Led by Bartlett School of Sustainable Construction, University College London

- **Contributions:** Conducted research and literature analysis on climate change and low-carbon transition; collected and cleaned data; participated in building a structured reference database.
- **Findings & Achievements:** Helped establish a structured and reliable database that improved data organisation and supported ongoing literature analysis.
- **Harvest:** Elevated analytical skills for accurate problem identification and problem solving; fostered strong communication and collaborative abilities.

Research Member, A Comprehensive Analysis of the US Office Rental Market (2018-2024) for the Identification of Post-pandemic Trends and Strategic Investment Opportunities

Mar. 2025

Guided by American Statistical Association (ASA) DataFest 2025

- **Contributions:** Adopted statistical techniques and data visualisation in Python to draw insights from real-world datasets, including rent trends, occupancy recovery patterns, and economic drivers.
- **Findings & Achievements:** Identified mismatches between occupancy rates and rental prices; categorised markets into strategic groups (e.g., high-risk, tenant-favourable, and investment-ready).
- **Harvest:** Worked in a high-pressure, time-bound environment to deliver a data-driven presentation and strengthened collaborative problem-solving skills.

PAPERS & PUBLICATIONS

- Zhang, J., **Wang, C.***, & Liu, M. Generative AI Use Profiles and Academic Outcomes in Higher Education: The Role of Institutional Support. Manuscript accepted by *Interactive Learning Environments* (SSCI, Q1; IF: 6.3). <https://doi.org/10.1080/10494820.2026.2668610>
- Liu, Y., **Wang, C.**, & Li, Y. (2025, April). Analyzing the Price Elasticity of Demand in China's Tourism Sector: Key Economic Drivers and Implications. In *Proceedings of the 2024 6th International Conference on Economic Management and Model Engineering (ICEMME 2024)* (Vol. 322, p. 146). Springer Nature.

INTERNSHIP EXPERIENCES

Research Assistant, School of Computer Science, Wuhan Institute of Technology **Sep. 2025-Sep. 2026**

- **Engaged Projects:** How AI adoption-capability profiles and institutional support shape university teachers' perceived teaching-role impact; generative AI use profiles and academic outcomes in higher education: the role of institutional support.
- **Research Support:** Collected, cleaned, and analysed survey-based data; conducted latent class analysis, ordered logit modelling, bootstrap tests, and XGBoost robustness checks; interpreted findings for manuscript writing and revision.
- **Research Findings:** Found that low-adopting teachers perceived the strongest AI-related role disruption, while students' GenAI use profiles predicted capability gains beyond usage intensity; institutional support showed positive effects in both studies.
- **Achievements:** Wrote and submitted two research articles: one accepted by an SSCI journal and one currently under review by an SSCI journal.

Intern Teacher, Wuhan Libertar Education & Technology Co., Ltd. **May 2025-Jun. 2025**

- **Student Progress Monitoring:** Tracked students' learning progress and vocabulary acquisition via regular assessments and follow-up.
- **Instructional Support:** Graded mock exams and assignments, offered tailored explanations, and clarified difficult concepts for students.
- **Multi-party Communication:** Liaised proactively with colleagues and supervisors, including sorting out feedback, raising feasible solutions, and adapting to time-sensitive tasks effectively.

Intern Teacher, Summer Camp, Wuhan Jingkai Foreign Language School **Jul.2024**

- **Classroom Management:** Maintained classroom discipline, organised group activities, and ensured students stayed on task during lessons.
- **Student Mentoring:** Provided one-to-seven support for students who need additional help, answering their questions and offering guidance on assignments.
- **Administrative Support:** Assisted with attendance checks, lesson preparation, and other administrative tasks to support the camp's smooth running.

EXTRACURRICULAR ACTIVITIES

Player, Table Tennis Team, University of Edinburgh **Sep. 2024-Present**

- **Training and Competitions:** Attend regular training sessions to improve skills and compete in inter-university matches.
- **Team Contributions:** Support team development by assisting with skill-building for new players and fostering a collaborative environment during practice.
- **Achievements:** Secured the Runner-up position in the Edinburgh Championship (19-40 Brand 2), showcasing competitive excellence and dedication.

SKILLS & LANGUAGES

Technical Skills: python(proficient); R (proficient); SPSS (proficient); Stata (proficient); MS Office (proficient, especially in Excel)

Languages: Mandarin (native); English (fluent)

SELF-ASSESSMENT

-
- Built a strong academic foundation in quantitative methods and applied econometrics.
 - Passionate about mathematical and statistical analysis techniques, like causal inference methods, to solve real-world economic and strategic problems.
 - Adept at carrying out literature-based, interdisciplinary research and analysis at the intersection of data science, economics, and business strategy.
